Subject: FW: Chemours precip and source samples update RE: Pls call me at 404-562-8218 RE: NC

Hi Tim,

We tried calling you today, **Ex. 6 Personal Privacy (PP)** Lucky you.

When you get back, maybe we could talk to see where your lab is on the Chemours stack test samples (if you have the capacity to run these or not).

Thanks,

Danny France
Deputy Director
Region 4, EPA, Science and Ecosystems Support Division

Subject: Chemours precip and source samples update RE: Pls call me at 404-562-8218 RE: NC

I spoke to both Jim Bowyer and Michael Pjetraj this afternoon to obtain clarification of the items that were mentioned to Vickie this morning. Jim said that the precipitation samples would no longer be coming to SESD effective immediately. NC DAQ has contracted the services of another laboratory to analyze the precipitation samples. We will complete the analysis of the four 'Chemours - rain water' projects that we currently have inhouse. But, we won't be receiving any more precipitation samples.

Michael said that NC DAQ's intent for the source test samples is to send them to EPA - ORD for analysis of the non-target PFAS compounds. Further, he said that if ORD wanted the results of the target compound analysis, then they could include the targets in their analysis and that NC DAQ would be happy to receive those results as well. If ORD decides to only analyze for the non-targeted compounds, then the samples would remain unanalyzed by either EPA laboratory for the target compounds. NC DAQ will not send split samples to both ORD and SESD.

Michael did say that as of today, ORD has not officially accepted the work. So, NC DAQ isn't sending any source samples to ORD yet. Michael did mention that Chemours is beginning another round of source testing today or tomorrow. I gathered from what he said that Test America would be sending split samples from this event for analysis of the targets to SESD if ORD hasn't accepted the work by the time Test America has prepared them.

Let me know if you have any questions,
Floyd
